13 Off Market Transfers

13.1 Purpose

Off market trades result when an investor wishes to transfer securities from one BO account to another account outside the exchanges which have to be settled in the system by DVP or by free delivery, with dual matching transactions.

13.2 Modes of Operation

Off market request can be set up in online or offline. The requests set up in offline will be available only for offline modification or inquiry. Offline requests once successfully uploaded will be available for online modification or inquiry.

13.3 Access Restrictions

Off market requests can be set up by Broker, Regular Custodian and Exchange depository participants for their respective beneficiary owners.

Cancel	To cancel Setup operation and return to the previous screen	Alt + C

On successful Off Market Request set up, the Transaction ID so generated will be displayed to the user

VeDAS Implementation	OffMarket
User Manual – DP	

In Online Mode, once the DP enters an off-market transaction for its BO, the Off Market Matching process searches for the matching transaction of its counter party DP in the database. The process tries to find a transaction with all the details matching to form a trade. It tries matching following fields: ISIN, Quantity, price, Consideration, Cash Transfer Flag, Requested settlement date, Trade Date. If the Trade reason code is '3' i.e. For an On Market Sale/Purchase then the Exchange ID, Obligation ID and Trading segment (the trading segment is defaulted to **A-Auction Trading segment**) also form a part of Matching criteria. If the conditions mentioned above are satisfied, then an off-market trade is generated. Both the matching transactions are marked as 'MATCHED' and a unique Trade Id is generated for those transactions.

If the Off-market transactions are made for either Trade Reason 7- *Treasury Bills* or 8-*Foreign/Custodian Trades* or 3- *On-Mkt Sale/Purchase*, then the SEC Approval Date is not required. For all other Trade Reasons SEC approve Date is required and matching is also done on the SEC approval date.

In case of Offline Mode the transaction ID is generated when the transactions are uploaded to the host.

After a trade is formed, whenever the settlement scheduler is started, it will perform all the debits/credits for the trades whose Requested settlement date equal to the current business date to the respective BO Accounts.
