Half-Yearly & Quarterly Performance	92
Shareholding Composition of listed Securities	101
CSE over the Counter (OTC) Market	102

Capital Market of a country is regarded as an economic indicator. But, unfortunately, the Bangladesh capital market has been facing huge crisis and weaknesses since long. We have been observing unusual volatility and negative trend during last few months. Whereas, the economy is progressing to achieve a GDP growth of above 8%.

Considering the situation, CSE likes to place some recommendations as follows: 1. Existing regulatory structure regarding sponsor shareholding, placement holding and book building system to be reviewed and revised to ensure reasonable shareholding by the entrepreneurs with a view to minimize undue volatility of the market. In this context, following points may be considered: (a) After listing if a company declares stock dividend, sponsor and director portion of such stock shall be subject to lock in for a period of two years from the date of issuance/approval of such stock dividend. (b) Placement shares shall be restricted maximum 10% of the Pre-IPO share capital. Placement holders shall no way be connected with the issuer company. (c) Sale declaration of director and sponsor shares shall be executed after 15 days from the date of declaration. 2. Appropriate fiscal strategy may be framed to encourage quality companies to be listed in the capital market. In this context, following measures may be considered: (a) Increase corporate tax rate gap up to 15% between listed and unlisted companies. (b) Full tax exemption for 2/3 years to newly listed companies. (c) Reduced tax rate (maximum 10%) to SME companies to be listed with SME Board of the exchanges. 3. Necessary steps to be taken to list government companies. 4. Appropriate policy to be taken to list foreign companies including banks and insurance sectors. 5. As per international practice scrip netting facility to be implemented in the settlement system of exchanges. 6. AMC's may be encouraged for more investment and active role in the market. 7. Capital market exposure of banks should be calculated on the basis of cost price instead of market price. 8. There is no provision of Consolidated Capital Market Exposure reporting requirement in Bank Companies Act. As such Dos Circular Letter# 07/2014 dated 25/02/2014] regarding consolidated reporting of capital market exposure should be reviewed. 9. Unlisted shares and bonds to be excluded from capital market exposure. 10. Threshold of tax exemption limit of dividend income to be increased and source tax from dividend income may be considered as final disposal of tax liability. 11. An effective corporate bond market should be developed to support money market as well as capital market. CSE has all the resources to implement a bond platform subject to necessary regulatory support. 12. Issuing Stock dividend may be discouraged through revised policy directives. 13. To enhance network of brokerage services extension office/ booth of brokerage services may be allowed within the city corporation areas irrespective of the distance from Head office. 14. A national co-ordination committee may be formed for development of capital market of the country.

In the first quarter of this year, Chittagong Stock Exchange Limited (CSE) has organized a roundtable discussion on "Ring the Bell for Gender Equality" on the occasion of International Women's Day 2019 in March at CSE Conference Hall, CSE, Chittagong. CSE has organized the program as the first time as a Partner Stock Exchange of the United Nations Sustainable Stock Exchanges Initiative (UN SSE), headquartered in Geneva. Globally, the theme of this year of the event is: "Think equal, build smart, innovate for change". The "Ring the Bell for Gender Equality" event series is a partnership of the Sustainable Stock Exchanges Initiative, together with the United Nations Global Compact, UN Women, IFC, Women in ETFs and the World Federation of Exchanges to raise awareness about the opportunities for the private sector to advance gender equality and sustainable development.

CSE is going to introduce Small Cap Board. BSEC has approved the gazette to bring it into practice. Market may be dynamic by virtue of the trade of small cap companies.

Stock Market Literacy: Third Basic Element for Investors

Professor Dr. Mohammad Saleh Jahur

1.0 1ntroduction

The stock market in Bangladesh is characterized by low number of listed companies and poor number of products unlike other developing stock market like India and Malaysia, and developed stock market of USA, United Kingdom and Japan. Bangladesh has been striving for forwarding this market to the new height and making this market as a very good alternative to the money market and non-security segment of the capital market; but the authority is facing a difficult constraint among others-inadequate informed and knowledgeable Investors and corporate firms. To develop this class, BSEC has taken a literacy program for developing class investors who are expected to be knowledgeable, informed, and aware of market. That is, the informed and knowledgeable investors will be pro-active- able to identify best security through analysis of risk and return, able to read and monitor the market properly, to have adequate knowledge of different stock market products, and to have knowledge and information regarding clearing and settlement. All these features of a class investor are essential

Investors-Individual and institutional investors play an important role in stock market. The role of investors is the key to success of market guided economic system. Because they supply funds in the form of investment in the stock market and their investments need to be channelized to the most rewarding sectors of the economy. This depends on the perfect decisions of the investors. In this case, institutional investors like dealers, banks, insurance, merchant bankers and mutual fund have

dominance role; however, aggregate role of individual investors if they guide themselves properly through their knowledge and wisdom can exert more positive influence in the stock market development-vertical and horizontal of any country. In view of this, the objective of this write up is to provide concepts regarding trading mechanism of stock market and role of different parties to this trading mechanism of the secondary stock market

2.0 Functions of Stock Exchange in the Secondary Market

Basically the secondary security market performs four basic functions such as liquidity, competition, efficiency and continuity. These functions are discussed as follows by means of sub-setting categories:

1. Pricing of Securities and Setting Fair Price:

The stock market helps to value the securities on the basis of demand and supply factors. Prices of securities are determined through continuous trading activity in stocks and debentures. As a result, the fair price of securities can be set for investors. The securities of profitable and growth oriented companies are valued higher as there is more demand for such securities. The valuation of securities is useful for investors, government and creditors. The investors can know the value of their investment, the creditors can value the creditworthiness and government can impose taxes on value of securities.

- 2. **Industrial Financing:** A country's industrial development is due to the availability of capital. Capital required for investment in industries comes from stock exchanges.
- 3. **Regulation of the Corporate Sector:** Documents of listed companies are mandatory to be submitted in the stock exchange like the annual returns, and provide information regarding plans to merge with or acquire other companies.
- 4. **Optimum Resource Allocation:** Stock exchanges permit for maximum optimum allocation of scare capital resources. Capital is the most essential ingredient needed for businesses. Stock exchanges helps in allocation of capital to companies which are performing well and have potential for profitable growth in the future.
- 5. **Investor Education:** Stock exchanges give vital information to the investors in their web sites, through advertisement in print media regarding the do's and don'ts towards investing and encourage conduct of investor awareness programs. This enables investors both in the urban as well in rural areas to become aware of stock market investment and make prudent investment decisions.
- 6. **Mobilization of Savings:** Stock exchanges play an important role in mobilizing savings of individuals and institutions. Savings so mobilized can be utilized to invest in various projects boosting industrial and economic development of a country.
- 7. **Protection of Investors:** Companies that are listed in the stock exchanges have to follow certain rules and regulations. They have to submit various documents and returns and provide information regarding any important activity they plan to undertake. Stock exchanges have formulated regulations to ensure safety of investor's funds.

- 8. **New venture creation:** Stock exchanges enable creation of new ventures. Any new venture requires financing. Stock exchanges are an important avenue for new ventures to raise capital for meeting their capital needs. The stock exchange has aided new venture creation by enabling promoters to raise the required funds.
- 9. **Meeting Financial Needs of Government:** The government requires funds to undertake various projects and government companies need funds for expansion, diversification etc. The government, municipal corporations, state financial corporations etc can raise funds through the issue of shares, bonds etc.
- 10. **Continuous Market for Securities:** The Investors are able to invest in good securities and in case of any risk, it enables people to switch over from one security to another. So stock markets provide a ready and continuous opportunities for securities.
- 11. **Evaluation of Securities:** It the stock exchange, the prices of securities clearly indicate the performance of the companies. It integrates the demand and supply of securities in an effective manner. It also clearly indicates the stability of companies. Thus, investors are in a better position to take stock of the position and invest according to their requirements.
- 12. **Mobilizes Savings:** The savings of the public are mobilized through mutual funds, investments trusts and by various other securities. Even those who cannot afford to invest in huge amount of securities are provided opportunities by mutual funds and investment trusts.
- 13. **Healthy Speculation:** The stock exchange encourages healthy speculation and provides opportunities to shrewd businessmen to speculate and reap rich profits from fluctuations in security prices. The price of security is based on supply and demand position. It creates a healthy trend in the market. Any artificial scarcity is prevented due to the rules and regulations of the market.
- 14. **Mobility of Funds:** The stock exchange enables both the investors and the companies to sell or buy securities and thereby enable the availability of funds. By this, the money market also is strengthened as even short-term funds are available. The banks also provide funds for dealing in the stock exchanges.
- 15. **Stock Exchange Protect Investors:** As only genuine companies are listed and the activities of the stock exchange are controlled, the funds of the investors are very much protected.
- 16. **Stock Exchange helps Capital Formation:** Stock exchange plays an active role in the capital formation in the country. Companies are able to raise funds either by issuing more shares through rights shares or bonus shares. But when a company wants to go in for diversification, they can issue the shares and raise more funds. Thus, they are able to generate more capital and this promotes economic growth in the country.
 - Proper Canalization of Capital: Stock exchange directs the flow of savings into the most productive and profitable channels.
- 17. **Regulation of Company management:** The companies, which want to get their securities listed in the stock exchange, should have to follow certain rules and fulfill certain conditions. Thus stock exchanges safeguard the interest of the investing public and also regulate company management.

18. **Economic Barometer:**

A stock exchange is a reliable barometer to measure the economic condition of a country. Every major change in country and economy is reflected in the prices of shares. The rise or fall in the share prices indicates the boom or recession cycle of the economy. Stock exchange is also known as a pulse of economy or economic mirror which reflects the economic conditions of a country.

19. Liquidity:

The main function of stock market is to provide ready market for sale and purchase of securities. The presence of stock exchange market gives assurance to investors that their investment can be converted into cash whenever they want. The investors can invest in long term investment projects without any hesitation, as because of stock exchange they can convert long term investment into short term and medium term.

20. Providing Scope for Speculation:

To ensure liquidity and demand of supply of securities the stock exchange permits healthy speculation of securities.

3.0 Structure of the Secondary Stock Market

The secondary security market can be segmented into organized stock market and over-the-counter market (OTC). The functions of these and role of different parties are described as follows:

3.1 Organized Stock Market

t is a marketplace, wherein there is no direct contact between the buyer and the seller, like CSE or DSE. There is no counterparty risk as an exchange is a guarantor. Also, heavy regulations make it a safe place for investors to trade securities. However, investors face a comparatively higher transaction cost due to exchange fees and broker's commission.

3.2 Over-the-Counter (OTC) Market

Over-the-Counter (OTC) means the facilities provided by an exchange for the purpose of buying or selling of unlisted or delisted securities from the stock exchanges. The OTC Market provides an alternative to stock exchange listing for securities of issuers that either choose not to be listed on Stock Exchange or not to meet the relevant listing requirements. The term "OTC Securities" is a catch –all phrases for any security that is not listed on stock exchange. It is a decentralized place, where the market is made up of members trading among themselves. Foreign exchange market (FOREX) is one such type of market. There is more competition among the participants to get higher volume, so prices of security may vary from seller to seller. Also, OTC markets suffer from counterparty risk as parties deal with each other directly. Following benefits can be derived (CSE Website) from OTC Market:

- I. Companies with small and medium paid-up capital get opportunity of trading their shares in Stock Exchange
- II. Favorable issue cost for entrepreneurs

- III. Enhanced visibility through national exposure
- IV. Improved investment opportunities for growth sector enterprises
- V. Zero percent interest finance for Entrepreneurs
- VI. Provides a source of valuation of securities

Companies Eligible for OTC Facilities are listed below:

I. Unlisted company

A public limited company issued securities but not offered for public subscription is an unlisted securities. If any company is a unlisted company and it meets up the following criteria then it is eligible for OTC facilities

- Paid-up capital at least taka Ten million
- Regularly holding its AGM
- No accumulated loss

II. De-listed company

Companies de-listed from CSE and/or DSE

4.0 Trading Mechanism of Stock Exchange

Investors have to be aware of trading mechanism of stock exchange. This has a greater implication for investors and others related parties to the trading mechanism. Unlike stock trading in the organized exchange, trading mechanism of derivative products involves role of clearing house agent (adjunct to the exchange). Besides, This would increase the confidence level of investors in the trading system of the stock exchange.

- 4.1 **Trading Hours:** Stock market remains open five days in a week from Sunday to Thursday excluding government/national holidays. The trading hours on the opening day of trading is four hours as follows:
 - Market opens at 10:30 am local time.
 - Market closes at 02:30 pm local time
- 4.2 **Trading System:** Chittagong Stock Exchange was the first stock exchange in the country to introduce automated trading system on June 1998. The trading system at CSE was known as CHITTRA at that time. It connected major cities of Bangladesh enabling all members to trade nationwide simultaneously with ease and efficiency. CHITTRA provided a screen based, quote-driven trading facility. Investors were allowed to quote an expected price in their buy/sell orders. CHITTRA automatically matched the best prices.

Millennium Exchange and goTX Systems (CSE Website)

On October 20, 2011 Chittagong Stock Exchange launched its much awaited Next Generation Trading System (NGTS). Through NGTS project CSE introduced a very powerful matching engine capable of handling 2500 orders/sec, 1,000,000 orders/day. The system is highly scalable and can scale up to even higher order and contract rates. CSE integrated the products "Millennium Exchange" from Millennium IT (a member of the London Stock Exchange group) and "goTX" from Polaris Lab to introduce a powerful real time online trading platform.

MIT solution supports multiple asset class, multiple market structure and comprehensive range of order types. Multiple trading methods and trading across multiple order books are also supported. Other features include unrestricted trading or controlled trading (price bands, circuit breakers etc) Flexible order book prioritization schemes (price-time, price-capacity-time, size-time etc), Off-book trades, Real-time publication of order book and time and sales information, Comprehensive range of statistics (high/low, VWAP, volume, indicative auction price etc), Flexible user permission schemes, Comprehensive market operations functionality (manage orders, cancel trades, halt/resume trading, extend/shorten sessions, suspend participants, manage static data etc), FIX and FAST based interfaces for order submission, trade reporting, drop copies and market data are some other major features of MIT solutions.

Millennium Exchange is a Distributed, Message based, Software fault tolerant system. It runs on user defined trading rules, User defined roles for traders. SUSE Enterprise Linux is the Operating System and Oracle is the Database. Millennium Surveillance Module supports Real time and offline analysis and pattern configuration. It can generate Effortless market replay, Comprehensive case management. It has Powerful reporting capabilities, Enhanced relationship detection, Flexible and powerful charting and Compliance capability.

Risk Management System (CSE Website)

Risk Management System (RMS): Provides Facility for the Members to Manage the Investors Stocks, Cash, Margins and Risk parameters, Supports Collateral margins, Stocks Margins, Receivable Margins etc. The solution also supports many risk products like Intraday/Delivery, Short Sell etc. It Supports Auto Square off functions and Risk Square off functions. There are Mark to Market Alerts, Cash Alerts, Margin alerts and Stock Alerts. Real time Monitoring of Mark to Market and Margin Blocking & Square off Support is included in the solution.

- 4.3 **Trading Orders:** Generally there are three types of trading orders such as market order, limit order and stop order. Stock exchange has scientifically developed different types of order for making them more convenience to the different parties specifically for investors. CSE trading system provides immense flexibility to the investors in terms of kinds of orders that can be placed to trade. The system allows the user to modify or cancel an order prior to execution. The most frequently order on the CSE is the "limit order", which is an order to buy or sell at a specific price. Conditions related to time can be easily made into a limit order, which are as follows
 - o **Good Till Cancelled (GTC):** A GTC order is the order that remains in the system for a period

- not exceeding one calendar week or the member cancels it.
- o **Good For Day (GFD):** A GFD is the order, which is valid for the day on which it is entered. If the order is not matched during the day, the order gets cancelled automatically at the end of the trading day.
- o **Good Till Date (GTD):** A GTD order allows the member to specify the number of days not exceeding one calendar week for which the order shall stay in the stay in the system. At the end of this period the order shall be deleted from the system.

In addition to limit order, the Exchange has introduced other following types of orders for the investors

- Market order: Market Order is an order to buy or sell a certain quantity of particular security at the best price or prices prevailing in the market at that point of time. Volume related conditional market orders are following categories:
 - o **Full Fill or Kill (FOK):** A FOK order is the order that will match for a trade at the Market Price only if the total quantity is available.
 - o **Partial Fill Rest Kill (PFRK):** A PFRK order is the order that will match for a trade at the Market Price for the quantity available in the market. The balance quantity, if any, will be deleted from the system.
 - o **Partial Fill Rest Convert (PFRC):** A PFRC order is the order that will match for a trade at the market price for the quantity available in the market. The balance quantity, if any, will be converted to a Limit Order at the last traded price.
 - o **Minimum Fill:** An order in which the minimum quantity must be filled.
- **Drip Feed Order:** A Drip Feed Order is an order in which the member has the option to specify a replenish quantity along with the total order quantity. Only the replenish quantity is revealed to the market. The quantity gets replenished only when the previous quantity has got traded and every time the quantity gets replenished, the visible quantity gets a new time stamp.
- **Stop Loss Order:** A Stop Loss Order allows the member to place an order, which gets activated only when the market price of the relevant security reaches or crosses trigger price. A stop loss order can be modified or deleted until it is not converted to a limit order.
- Match at Closing Price Order: A 'Match at Closing Price' Order allows the Member to specify order to be executed at Closing Price.
- Spot Order: Members shall be allowed to carry out spot order on CSE system arising out of closure of book or closure of the renunciation period of listed Companies. A spot order is traded against another spot order only.
- **Bulk lot order:** Bulk lot orders are multiple of market lot orders, which contain multiple numbers of certificates. Each of the Bulk lot order shall match with equal quantity and best price. The minimum amount for a bid of bulk lot for a certain security shall be Tk 0.5 (point five) million at market price unless otherwise fixed by the Board time to time with the approval of the BSEC.

- **Big Lot Order:** Big lots are multiple of market lots inscribed in one single certificate. Each of the big lot order shall match with equal quantity and equal or better price.
- Auction Order: Auction Order shall be an order entered by CSE. The Exchange will specify a rate with price brand for each security when putting the auction order. The auction orders entered by CSE cannot be modified or deleted once the auction session has started.
- **4.4 Price Limit:** Price Limit means a price control mechanism used to minimize the excessive volatility in the market. Since unusual and abnormal price fluctuation of the securities may severely affect investor's interest CSE, as an additional measure of safety, imposes price limit on the securities trading of 'A', 'B' 'G', 'N' & 'Z' category companies as per the following guidelines. A Committee named "Share Price Movement Regulating Committee" comprised of CSE Secretariat is responsible to regulate the price limit in the market.

Guidelines: As per BSEC's Order No: SEC/CMRRCD/2001-07/168 dated 13 May 2015, the following standard upward and downward price limits are applicable for 'A', 'B' 'G', 'N' & 'Z' category companies for each market days:

SL No.	Previous day's Market Price Per Share	Limits
01.	Upto Tk. 200	10% (Ten Percent)
02.	Tk.201 to Tk.500	8.75% (Eight Point Seven Five Percent)
03.	Tk.501 to Tk. 1000	7.5% (Seven Point Five Percent)
04.	Tk.1001 to Tk. 2000	6.25% (Six Point Two Five Percent)
05.	Tk.2001 to Tk.5000	5% (Five Percent)
06.	Tk.5001 and above	3.75% (Three Point Seven Five Percent)

However, the above price limit will not be applicable in the following cases:

- A newly listed securities is allowed for free trade for first 2(two) consecutive market days.
- Free trade is also allowed on the subsequent trading day of receiving price sensitive information like rights issue, bonus issue and dividend from the listed company. After the day, the price limit will be applicable as usually.
- **4.5 Trading Sessions:** Trading may be conducted on every trading day as per the time decided by CSE. Trading period shall be divided into the following sessions:

I. Pre-opening session:

During this session order entry, deletion/modification of limit orders are only permitted. Execution of orders shall not be done during this session. The previous day's closing price and index will be available to the dealers/brokers during this session.

II. Opening session:

During this session matching of orders shall be done at opening price. The opening price shall be calculated based on the orders entered into the system during the pre-opening session, as well as the pending orders of the previous trading day session. The opening price of a security shall be the price at which maximum number of securities is matched.

In the event of there being no trade for certain securities, then the last closing price for the security shall be made the opening price for the day.

No order entry shall be permitted during this session.

III. Continuous Trading session:

During this session order entry, deletion/modification of orders can be provided. Orders shall be executed during this session and if an order can not be executed in whole or in part, then it will be stored as an unfilled order.

Unfilled orders from the pre-opening session shall be carried forward with time stamp to this session.

IV. Closing session:

During this session the system stops receiving orders. The closing price for a security shall be determined as per the weighted average price of all the trades in the last 30(thirty) minutes before the closing session. If there is no trade during the above specified time, the weighted average price of maximum 50 (fifty) number of trades preceding the above 30(thirty) minutes shall be taken for determination of closing price. If there has been no trade in the security during the continuous trading session the opening price of the security shall be treated as the closing price.

Pending orders executable at closing price and orders 'match at closing price' shall be executed in this session. All other pending orders shall be carried forward to the Close Price Trading Session.

V. Close Price Trading Session:

During this session, the system will accept only 'match at closing price' order. This type of orders and all executable pending orders shall be executed in this Session at closing price. If any 'match at closing price' order is not executed in whole or in part, it will be removed from the system automatically and all other pending orders except the expired ones shall be carried forward to the following Trading Day.

VI. Post-closing session:

During this session the system will provide access to trading members to make enquiries, verify, and down load the daily transaction details.

4.6 Clearing and Settlement System of Organized Stock Exchange

All transactions carried out in CSE/DSE shall be evidenced by an Electronic Contract Note. Subject to the provisions of Regulation 12 all transactions evidenced by Electronic Contract Note shall be settled through the Clearing House. The Automated Clearing and Settlement System (CnS) is developed to automate all post trade activities regarding clearing and settlement. Its

main stakeholders are Brokerage houses, CDBL, Clearing Banks and CSE/DSE Finance Division. Major activities of the system are as below;

I. Settlement Day for Securities and Funds:

- a. Securities Settlement Day for all securities, transacted in all markets, other than those transacted on behalf of a Foreign Investor shall be the Trading Day (i.e. T+0).
- b. Securities Settlement Day for foreign investors for all securities, except transaction of the spot market or contract (howla) type "DVP", shall be the next day following the Trading Day (i.e. T+1).
- c. Fund Settlement Day for all contracts transacted in markets other than the spot market and contract (howla) type "DVP" shall be the next day following the Trading Day (i.e. T+1).
- d. Fund Settlement Day for all contracts in spot market other than contract (howla) type "DVP" shall be the Trading Day (i.e. T+0).

II. Clearing Day for Securities and Fund:

- a. Clearing Day for all contracts other than securities listed under Z\(\textit{Z}\) category or contracts in spot market or contracts with contract (howla) type "DVP" shall be the second day following the Trading Day (i.e. T+2).
- b. Clearing Day for contracts listed under Z⊠category other than contracts in spot market or contracts with contract (howla) type "DVP" shall be the ninth day following the Trading Day (i.e. T+9)
- c. Clearing Day for all contracts in spot market other than contract (howla) type "DVP" shall be the next day following the Trading Day (i.e. T+1).

III. Position for settlement:

- a. The Clearing House shall work out the due position of every TREC holder in all categories of securities in which it deals in on a Trading Day; and
- b. The Clearing House shall also ascertain the net balance of funds receivable from and payable to every TREC holder for the Trading Day; and shall notify every TREC holder the due position and the net balance as aforesaid on the Trading Day for settlement:
- c. Provided that transactions in 'Z' category companies or transactions in spot market or transactions with contract (howla) type "DVP" shall not be net of in calculating net balance of funds receivable and payable:
- d. Explanation: The due position for every securities means total securities sold by the TREC holder on a Trading Day, unless otherwise defined by the BSEC from time to time.

IV. Settlement by delivery of securities and payment by electronic transfer or cheque/ pay order/ demand draft by the TREC holder:

- a. Every TREC holder or Clearing Member shall deliver securities to the designated Clearing BO Account and make the fund available in the designated Clearing Bank Account to facilitate CSE/Clearing House to secure payment through electronic transfer on the Settlement Day.
- b. In case of a force majeure event (an event that is caused by something beyond the control of the Exchange or the TREC Holder), a TREC holder may settle the payment of fund through cheque/pay order/demand draft during such period, which shall not exceed one month from the date thereof.

5.0 Conclusion

This write up is expected to provide knowledge and information about trading mechanism of the organized stock market. This has been written on the basis of Website of CSE/DSE and regulations being followed by them in the case of trading mechanism. The next write up will be on the process of issuing shares and securities in the primary market and implication for investors therein.

Investing: Luck or Skill

Md. Ahsan Ullah Raju

When someone wins a lottery, we say he is lucky. But when his stocks go up by 100%, we think he is skillful and run to him for investment advice. There is always a confusion on whether the investing is pure outcome of luck or pure outcome of skills or something in-between. This article is all about defining luck & skill and its impact on investment returns as well as real life. The overall conceptual framework is mainly derived from the writings and the interviews of Michael Mauboussin, Director of Research at BlueMountain Capital Management.

What is Luck?

Oxford dictionary defines luck as "success or failure apparently brought by chance rather than through one's own actions." The author of the book 'The Success Equation', Michael Mauboussin says "Luck is trickier. I like to think of luck as having three features. First, it happens to a group or an individual. Second, it can be good or bad. I don't mean to imply that it's symmetrically good and bad, but rather that it does have both flavors. Finally, luck plays a role when it is reasonable to believe that something else may have happened."

Suppose, a student learnt 8 answers out of 10 questions for an exam. Usually, student has to write 2 answers out of 4 choices, but this time he has to answer 2 out of 2. His performance on the exam is

beginning to seem like a crapshoot when the 2 answers are the answers that he didn't study or his performance could be a great one when the 2 answers are the answers that he studied or something middle while only 1 out 2 answer is familiar to him. Here, if there are 4 questions, the outcome would be predictable; but if there are 2 questions, the

Source: Michael J. Mauboussin, The success equation: untangling skill and luck in business, sports, and investing (Boston: Random House, 2012), 39.

outcome would be unpredictable. The latter situation is a situation of luck where the student can do best or worst or something in between. Here, firstly exam's grades has effect on student's overall result, secondly it is either good or bad and finally it is reasonable to assume that another result is possible if only teacher had selected different questions.

Spain has had a national lottery since 1763. The most coveted prizes are awarded in the days before Christmas. The first prize, known as El Gordo ("the fat one"), paid out €4 million in 2011. In the mid-1970s, a man hunted for a lottery ticket with the last 'two digits ending in 48. He found a ticket, bought it, and then won the lottery. When asked why he was so intent on finding that number, he replied, "I dreamed of the number 7 for seven straight nights. And 7 times 7 is 48."1 A pure example of luck.

What is Skill?

The dictionary defines skill as the "ability to use one's knowledge effectively and readily in execution or performance." There is a quick and easy way to test whether an activity involves skill: ask whether one can lose on purpose. Suppose, a carpenter is well known to build nice table. The ability of making a table is pure example of skill because he can intentionally make an unbalanced table making a leg lower. In games of skill, it's clear that one can lose intentionally, but when playing roulette or the lottery he can't lose on purpose.

When skill plays the major role, past performance can be used to predict the future. Like a swimmer, who did well in the last competition, it becomes predictable that he will do well in next one. Again, a horse, which did well in last race, it becomes predictable that it will do well in next one. Skill makes the result predictable and well connection is visible between skill and the result.

Luck-skill Continuum

In 2006, Trading markets, a company that helps people trade stocks, asked ten Playboy Playmates to select five stocks each. The idea was to see if they could beat the market. The winner was Deanna Brooks, Playmate of the Month in May 1998. The stocks she picked rose 43.4 percent, trouncing the S&P 500, which gained 13.6 percent, and beating more than 90 percent of the money managers who actively try to outperform a given index. Brooks wasn't the only one who fared well. Four of the other ten Playmates had better returns than the S&P 500 while less than a third of the active money managers did.2

Although the exercise was presumably a lighthearted effort at attracting attention, the results raise a serious question: How can a group of amateurs do a better job of picking stocks than the majority of dedicated professionals? Anybody would never expect amateurs to outperform professional dentists, accountants, or athletes over the course of a year. In this case, the answer lies in the fact that investing is an activity that depends to a great deal on luck, especially over a short period of time. Visualizing the continuum between luck and skill can help us to see where an activity lies between the two extremes, with pure luck on one side and pure skill on the other. In most cases, characterizing what's going on at the extremes is not too hard. As an example, a person can't predict the outcome of a specific fair coin toss or payoff from a slot machine. He is entirely dependent on chance. On the other hand, the fastest swimmer will almost always win the race. The outcome is determined by skill, with luck playing only a vanishingly small role (for example, the fastest swimmer could contract food poisoning in the middle of a match and lose). But the extremes on the continuum capture only a small percentage of what really goes on in the world. Most of the action is in the middle, and having a sense of where an activity lies will provide him with an important context for making decisions.3

Investing is a very competitive activity, and luck weighs heavily on the outcomes in the short term. Mauboussin placed the investing activities near to the pure luck between the pure luck and pure skill continuum. As his move from right to left on the continuum, luck exerts a larger influence. It doesn't mean that skill doesn't exist in those activities. It does. It means that we need a large number of observations to make sure that skill can overcome the influence of luck.

How to analyze the impact of luck

Mauboussin has recommended three tests to understand if there is any impact of luck in any activities.

- 1. Is it easy to understand cause and effect?
 - In a running race, for example, it is easy to predict who will win the race. In determining why the stock market did what it did, it is hard. The easier it is to determine causality the closer it is to the all skill end.
- 2. How rapid is reversion to the mean?

This idea says that when a person has an outcome that's far from average, the expected value of the next outcome is closer to the average. In running races, there is no reversion to the mean—he should expect the fastest runner to win every time. But in markets, the performance of investors exhibits rapid reversion to the mean. Less reversion to the mean means more skill.

3. How good are experts at predicting?

If a person knows the performance of runners in a prior race, predicting the winners is not hard. Predicting the performance of the market, on the other hand, is notoriously difficult. Easy prediction is associated with skill, and hard prediction means luck plays a role. The main point Mauboussin stress is that if he is near the all-skill end of the continuum, then he should focus on deliberate practice to improve his skill.

How to deal with luck

Micheal Mauboussin has discussed about three approaches to deal with luck in his book "The Success Equation". The first approach deals with reducing the advantage of a skilled opponent if he is the underdog and improving his advantage if he is the favorite. The second approach involves reducing the influence of luck by more effectively tying cause to effect. Finally, it is critical to understand the limits of what the person can understand. The strategy here is to learn how to define own limits and cope with events that have small and incomputable probabilities, but very large consequences.

First approach is explained by a story of David and Goliath. Goliath is a strong man, whose armor alone weighed 125 pounds, challenged the audience. No one dare to fight with him except David, a young shepherd, who got interested because the winner, the man who killed Goliath, will receive great riches & marry the king's daughter. When David entered the ring of the battle, David well understood that fighting with Goliath toe-to-toe would be very deadly. So, he changed his approach and he loaded his trusty slingshot, flung a stone at Goliath, and hit him in the forehead. Goliath fell dead on the spot. Here, David win the battle by changing the advantage of the skilled opponent and shifting the odds in his favor.

Randall Lewis and David Reiley, scientists at Yahoo! Research, ran an experiment for a large U.S. retailer on yahoo.com. The scientists created a sample of 1.6 million people and assigned 1.3 million to the experimental group and the other 300,000 to the control group. The experimental group was exposed to two advertising campaigns on Yahoo! in the fall of 2007, and most of the people saw the ads. They tracked what the people bought to measure the effects of the advertising. Lewis and Reiley found that users exposed to the ads bought about 5 percent more than the people in the control group, and the researchers estimated that the increase in revenues from the advertising campaign was seven times the cost of running the online ads. They also observed that the people who saw more ads bought more often and spent more money. So the advertising seemed to have worked. But here's an even more interesting point: The usual practice in advertising is to run an ad and watch what happens to sales. If the

researchers had done that, they would have concluded that their ad didn't work, because overall sales actually happened to go down during the period they studied. By taking sufficient care to isolate the influence of the advertising, Lewis and Reiley were able to show that the experimental group bought more than they would have had they not seen the ads.5 Randomness and luck are the result of insufficient information—an inability to pinpoint cause and effect. Controlled experiments can be a quick and effective way to improve our understanding of cause and effect.

Nassim Taleb offers a useful way to figure out where statistical tools are likely to work and where they

fail. He introduces a 2×2 matrix, where the rows distinguish between activities that can have extreme variation and those that have a narrower range of possibilities. The distribution of stature is a classic example, as the ratio between the tallest and shortest human on record is only 5:1. But extreme variation is a lot more difficult to deal with. For example, the distribution of wealth has extreme outcomes. The net worth of Bill Gates, in excess of \$50 billion, is more than 500,000 times more than the median net worth of all Americans. The columns of the matrix are the payoffs, and distinguish between the simple and the complex. Binary payoffs are simple: the team wins or

	Simple payoffs	Complex payoffs
Narrow outcomes	l Extremely safe	II (Sort of) safe
Extreme outcomes	III Safe	IV Black swan domain

Source: Nassim Nicholas Taleb, The Black Swan: The Impact of the Highly Improbable (New York: Random House, 2010), 365.

loses; the coin comes up heads or tails. Again, modeling these payoffs mathematically is relatively straightforward. Complex payoffs would include the casualties from a war. One may be able to predict a war, but there's no reliable way to measure its effect. Statistical methods tend to work well in quadrants one through three, and most of what we will be dealing with falls into one of those quadrants. Dealing with quadrant four is far more difficult. The fourth quadrant is the world of black swans. Taleb argues that having no theory or model of events in the fourth quadrant is preferable to having a theory or model, because the errors we make are huge and often lead to bad results. In practice, we try to use policy and models to manage a part of the world that defies control and understanding.6

In dealing with events in the fourth quadrant, Taleb recommends to avoid optimization and allow for redundancy. A person can optimize his behavior to serve a specific goal in a stable system. For example, swimming strokes have been improved and refined to maximize the swimmer's speed. This works because the basic relationship between the swimmer and the water is sufficiently constant over time. But optimization in a changing system is a

Source: Based on Nassim Nicholas Taleb, "Antifragility, Robustness, and Fragility Inside the 'Black Swan' Domain," SSRN working paper, February 2011.

setup for failure. If the person is an animal that evolved in a cold climate, he might die if the climate becomes too warm. Because optimization works well in some systems, there is a temptation to optimize in the fourth quadrant during times of relative stability. In building a portfolio of investments, for example, optimization would mean getting the highest return he can for a given level of risk. The person might decide to borrow money to make more money. But if the market tanks, he'll be wiped out quickly. One way to think

Source: Based on Nassim Nicholas Taleb, "Antifragility, Robustness, and Fragility Inside the 'Black Swan' Domain," SSRN working paper, February 2011.

about this is to ask under what conditions experts can predict well. We know that experts don't do so well when it comes to many political, economic, and social events. Where expert predictions are poor, optimization is a bad idea, because anyone can get locked in to one approach and can't adjust to change.

There are two kinds of payoffs in the fourth quadrant. In the first kind, shocks and mistakes lead to painful losses. This is what Taleb suggests avoiding, because the small gains over time do not compensate for the infrequent but sizeable losses. In the second kind, shocks will bring big profits, which is desirable. When it comes to managing luck, Taleb has two very useful messages. The first is to understand the limits of knowledge about events, that have probabilities, that can't be computed and consequences that are significant. The second is to take steps to make sure that whatever exposure a person do have in the fourth quadrant is the result like buying or acquiring short options of index and not the result of selling it (index short option seller make regular small profit, but irregular large losses in the time of market tanking and buyer of these option will make small regular losses, but large irregular profit at that time). Investor should not define his ultimate success by the frequency of gains, but rather by how much he makes when he is right versus how much he loses when he is wrong.

Mauboussin views on luck in investing

According to Mauboussin, It's hard to discuss skill in 'investing' activity without recognizing the role of luck. Some activities allow little luck, like running races & playing the violin or chess, where skill is defined as process of deliberate practice. Some other activities incorporate a large dose of luck, like poker & investing, where skill is best defined as a process of making decisions. When luck has little influence, a good process will always have a good outcome. When a measure of luck is involved, a good process will have a good outcome but only in long-term. In 'investing' good process and good result are loosely linked. It is tough to recognize whether short-term performance is outcome of good process or not. Since a good process offers the highest probability of a good outcome over time, the emphasis has

to be on process. So, Long-term outcomes certainly do give insight about an investment manager's skill, but in the short term the relationship between process and outcome is extremely unreliable.

Mauboussin prescribed to use checklist for the process. In investing this checklist can be renamed as IPS (Investment policy statement) or trading plan. As we know when luck has role to play in a process, it becomes very hard to predict the outcomes and creates huge mental pressure. Checklist provides a recipe for action that lets the investor take concrete steps to address the problem, even when he is not thinking clearly. A well back-tested checklist is very important do deal with unexpected situation arise in investment arena.

Every effect is not occurred by a cause. Mauboussin has well understood about this loose connection between the effect and the cause, though we think it is well connected. He explained, "To maintain an open mind about the future, it is very useful to keep an open mind about the past. We need to work hard to fend off our natural tendency to view what happened as having been inevitable. Our minds simply want to explain what happened and close the case, but the world followed but one path among many possible ones. If we do the Rain Dance and it rains, then to the human brain, it looks like the dance caused the rain. In the more rational part of our brain, we know it's not true. Yet we dance on." Sometimes, lucky one get right to pick right stock and he starts thinking he is skillful. He should know that every time, he will not be lucky and will not pick the right stock. It is better the know which works better in the past, like companies continuous growth expressed by earning leads to price movement, it is high probable that it will work in future.

Reversion to the mean is most pronounced at the extremes, so the first lesson is to recognize that when a person sees extremely good or bad results, he is unlikely to continue that way where luck has a role to play. This doesn't mean that good results will necessarily be followed by bad results, or vice versa, but rather that the next thing that happens will probably be closer to the average of all things that happen. In the investment arena, when an investor earn extra-ordinary return for a year, it is high probable that his return will be near to the mean or average in the very next year.

According to Mauboussin, when luck has role to play in a result, large result sample required to understand the strength of the process that is used. He said "When skill has bigger influence, small sample size from a large population is enough to understand the outcome. When luck has bigger influence, big sample size is required from large population to understand the outcome." As investing activities are near to the luck in the luck-skill continuum, long-term performance sample is require to understand whether the good process is used for the outcome or not.

Conclusion

It can be concluded for the investment arena that luck has a great influence in short-term results, and skill has its influence in long-term results. Investor can end up making profit while his intention was to make loses or he can end up making loses while intension was to make profit. Mauboussin said "there is

a big difference between saying that the short-term results of investment managers are mostly luck and saying they are all luck. Research shows that most active managers generate returns above their benchmark on a gross basis, but that those excess returns are offset by fees, leaving investors with net returns below those of the benchmark. Considering the evidence on balance, it is reasonable to conclude that there is evidence of skill in investing. However, only a small percentage of investors possess enough skill to offset fees. As a result, investing, especially over relatively short periods of time, is more a matter of luck than of skill."

SUKUK - An Islamic Product of Capital Market

Dr. S. M. Abu Zaker

A Muslim requires a balanced satisfaction of both the material and the spiritual needs of the human personality. The spiritual need is not satisfied merely by offering prayers; it also requires the moulding of individual and social behavior in accordance with the Shariah (Islamic teachings). 'Shariah' is an Arabic word meaning the path to be followed.

By dint of learning, understanding and research on Qur'an and Sunnah various Islamic economic products have been evolved. Meantime, Islamic Banking has been able to challenge the conventional banking. Thus in not only Muslim countries, the Islamic Banking has been growing fast in non-Muslim countries as well. The roots have reached to the insurance arena by introducing Takaful (Islamic Insurance). The latest development of the Islamic economic product is SUKUK which is a challenging instrument in the sphere of capital market.

The first Sukuk bonds were issued by Malaysia in 2002 with the issuance of the first sovereign five-year global Sukuk. The demands for Malaysian Sukuk have always been on the rise. Malaysia is now a leader in Sukuk transaction.

According to the Thomson Reuters State of the Global Islamic Economy Report 2015/16, there was \$295bn of Sukuk outstanding as of the end of 2014. According to the same report \$1.814 trillion of assets are being managed in a Shariah compliant manner as of 2014 which is expecting to rise to \$3.247 trillion by 2020. Malaysia dominates the market shares in world Sukuk market. As at first half of 2015 Malaysia holds the largest market share of 54.9% or USD171.7 billion of global Sukuk outstanding.

What is Sukuk

SUKUK is the Arabic name for financial certificates, but commonly referred to as Shariah compliant bonds. The Arabic word Sukuk is plural (sakk for singular). Its origin can be traced back to early Islamic periods where the issuance of paper representing commodities for salary payments was called 'suk'. In plural form 'suk' is Sukuk. Sukuk, in its simplest definition are similar to a bond in conventional finance but must comply with the Islamic religious law, Shariah. Sukuk as in the Arabic term are commonly referred to as Islamic bond although literally they are referred to as Islamic investment certificates too.

Sukuk are defined by AAOIFI (Accounting and Auditing Organization for Islamic Financial Institutions) as "securities of equal denomination representing individual ownership interests in a portfolio of eligible existing or future assets". Securities Commission of Malaysia (SC) in its 2011 Islamic Securities Guidelines (Sukuk Guideline) defined Sukuk as "a certificate of equal value which evidence undivided ownership or investment in the assets using Shariah principles". The Fiqh academy of the OIC legitimized the use of Sukuk in February 1988. It is similar to a traditional bond. As the traditional interest paying bond is not permissible (as it is based on interest which is forbidden by Qur'an and Sunnah), the issuer of a Sukuk sells it back to the issuer for a predetermined rental fee. The issuer also makes a contractual promise to buy back the Sukuk at a future date at par value.

Structure of Sukuk

In Malaysia, Sukuk issuance is regulated by the Securities Commission Malaysia. The structure of the Sukuk must be confirmed and approved by a Shariah Advisor appointed by the issuer who can either be an independent Shariah Advisor approved by the Securities Commission or a Shariah Committee with a Bank Negara-approved financial institution operating Islamic banking and finance activities.

Sukuk are structured in several different ways. While a conventional bond is a promise to repay a loan, Sukuk constitute partial ownership in debt (Sukuk Murabaha), asset (Sukuk Al Ijara), project (Sukuk Al Istisna), business (Sukuk Al Musharaka), or investment (Sukuk Al Istithmar).

Types of Sukuk

The Securities Commission's Islamic Securities Guidelines (Sukuk Guideline 2011) also mentioned several types of Sukuk applicable in Malaysia. They are Sukuk Murabahah, Sukuk Ijarah, Sukuk Mudarabah, Sukuk Musharakah and Sukuk Wakalah.

The seller of the Sukuk Murabahah is the issuer of the certificate, the subscribers are the buyers of that commodity and the realized funds are the purchasing cost of that particular commodity. The buyers or certificate holders own the Murabahah commodity who are entitled to the final sale price. The Sukuk Murabahah or the deferred payment Sukuk are more popular in Malaysia. Its trading in secondary markets are prohibited by Shariah due to the occurrence of trading in debt on a deferred basis which would ultimately result in riba (interest).

Sukuk Ijarah or lease-based Sukuk is basically a rental or lease contract that establishes the right to use

an asset for a fee. In simpler terms, it denotes that the Sukuk holders are the investors who are also the owners of the asset and are entitled to receive a return when that asset is leased or rented out. All costs of maintenance and damage to the real estate are borne by the Sukuk holders. These Sukuk provide the owners the right to own real estates, collect the rent and dispose the Sukuk in such that does not affect the rights of the lessee. As Sukuk Ijara are securities of joint ownership, they can be traded at secondary markets with a price determined by market agents.

Sukuk Mudarabah is Sukuk based on equity partnership where the investors (Sukuk holders) are the silent partners or rab al mal while the mudarib or working partner is the party who utilizes the funds. Profits from the investment activity are shared between both parties based on the agreed formula.

Sukuk Musharakah is joint venture Sukuk whereby all partners contribute capital, labour and expertise. The profits or losses are also shared among all parties based on initially agreed ratios and agreement. These Sukuk share similarities with Sukuk Mudarabah but in contrast, Sukuk Musharakah have a committee of Sukuk investor representatives participating in the decision-making process. It is possible to trade Musharakah Sukuk in a secondary market.

Under Sukuk Wakalah (agency), an Islamic financial institution packages its contracts, receivable, shares or Sukuk certificates held by it into a portfolio which is then sold to investors. The income derived from this portfolio is utilized for servicing the coupon payments due under the Sukuk certificates.

Difference between Sukuk and Bond

In contrast to conventional Bonds which confer ownership of a debt, Sukuk offers an investor a share of an asset along with the commensurate cash flows and risk, adhering to Shariah principles of prohibiting charging or payment of interests. Sukuk signify the possession of a tangible asset while Bonds are often indicator of debt obligations. The latter creates a 'lender and borrower' relationship between the bond issuers and the consumers where there is an existence of a fixed interest loan which is very riba in nature.

The face value of Sukuk is based on the market value of the fundamental asset whereas the face value of a bond price is based on the issuer's credit worthiness, often portrayed through its credit ratings. In the secondary market, a Sukuk sale means to sell an asset possession but selling a bond means selling a debt.

Sukuk also make it possible to raise the main asset and hence the value of the Sukuk certificates. This is not possible in bonds as the main debt cannot be raised.

Sukuk are suitable because they are asset-based securities rather than purely debt instruments. A Sukuk investor has a common share in the asset ownership linked to the investment which does not constitute a debt owed to the bond's issuer. This is different in conventional bonds where the issuer has a contractual obligation to pay to his bond holders on the stipulated dates, interests and principal. A bond is a share of debt, Sukuk are a share of the underlying asset.

Sukuk enable the future cash flow from the underlying asset to be transferred into the present cash flow as they may be issued for either existing assets or assets that will come in to the picture in the future. Sukuk investors are rewarded with a share of the profits from these assets and not interest payments, which is a violation of Shariah. They allow for the opportunity to invest in Shariah compliant assets which generally offer lower levels of risks but a predictable rate of returns. For cash-conscious investors, these instruments are tradable, allowing for easy liquidation.

Sukuk investors need to bear in mind that Sukuk are issued with specific maturity dates, the same with their conventional counterparts. Upon maturity, the Sukuk issuer buys them back. Initial investment in Sukuk is not guaranteed, meaning the Sukuk investors can or cannot get back the entire face value amount as they also share the risks of the underlying asset. In the event of defaults or failure to perform, the Sukuk investors must bear a share of the loss. (There are some Sukuk issued with repurchase guarantees. Sukuk Ijarah can sometimes come with a repurchase guarantee).

Conclusion

Sukuk are seen as an alternative to syndicated funding by many sovereign, multinational organizations, financial institutions and government-linked companies. Investors seeking long-term, credible and dependable source of investment returns should consider Sukuk for a viable investment alternative.

Islamic capital market starts its journey by introducing Sukuk in 2002 in Malaysia. In the passage of time it is growing fast as the Muslim investors showed deep interest on it. Gradually the Sukuk operations are being popular in various countries such as Indonesia, Brunei, Pakistan, Singapore, China, Bahrain, Egypt, Gambia, Iran, Kazakhstan, Kuwait, Qatar, Saudi Arabia, Singapore, Somalia, Turkey, United Arab Emirates, United Kingdom, Hong Kong and Sudan.

Bangladesh has become a role model of Islamic Banking. But Bangladesh could not enter in Islamic capital market like Sukuk as yet. Securities and Exchange Commission of Bangladesh can play a vital role to introduce Sukuk operations in prospective Islamic capital market of Bangladesh. A vast number of investors of Bangladesh can attracted in capital market by introducing Sukuk in the capital market of Bangladesh. The Muslim investors of all over the world especially Middle East are interested to invest their money in Sukuk. So we can attract huge amount of foreign investment in Sukuk by introducing it through a Shariah Advisory Committee that can be constituted under the guidance of Security and Exchange Commission.

Economic News

World Bank forecasts 7.3% GDP growth for Bangladesh

Bangladesh continues to be among the five fastest growing economies in the world, thanks to stable macro and export-oriented industry-led growth, the World Bank said in a new report.

But private sector investments remain insufficient along with declines in foreign direct investment. Growth outlook remains strong and stable, according to the report. The World Bank predicted 7.3 percent economic growth for Bangladesh for the current fiscal year. "Sound macroeconomic policies – such as keeping the budget deficit below 5 percent of GDP – and resilient domestic demand have led to growth in manufacturing and construction industries on the supply side," the WB said. On the demand side, growth is led by private consumption and exports. After a modest performance last year, export earnings and remittances have bounced back helping the rural economy grow faster. In addition, the country has substantially improved its electricity generation and a bumper agricultural harvest has further stimulated growth, according to the report. Foreign direct investment remains low at less than 1 percent of GDP. Net FDI inflow amounted to \$910 million in the first half of FY19, compared with \$823 million in the first half of FY18. The share of machinery in total imports for leading industries such as textiles, garments, pharmaceuticals, packing and leather has also declined, reaching 31.8 percent in July-November 2018 from 55.6 percent in 2009.

Bangladesh's GDP growth to scale 8% in FY19, says ADB

Bangladesh's GDP growth is set to hit 8 percent at the end of current fiscal based on the continuing positive trend in exports and public investments, the Asian Development Bank, or ADB, has said.

The ADB makes the prediction in its annual publication titled 'Asian Development Outlook 2019', or ADO 2019, after analyzing the state of the Bangladeshi economy. Manmohan Parkash, the ADB's director Bangladesh, country for highlighted various aspects of the report at a media briefing in the institution's Dhaka office. According to the report, the GDP of Bangladesh is expected to grow by 8 percent in 2019-2020 with robust private consumption, increased public investment, strong export performance, and expansion in industries. "To sustain this momentum in the medium to Bangladesh long-term, requires expanded

industrial base, diversified export basket, improved business environment for vibrant private sector development, expanded tax base, better revenue collection for increased resource allocation, and human capital development," said Manmohan Parkash. "Continued focus on prudent macroeconomic policies, sound debt management, strengthening the banking sector, removing infrastructure constraints, and reducing the cost of doing business are important to help achieve the long-term development vision of the country."

AIIB approves \$120m in loans for Bangladesh power sector

The China-based Asian Infrastructure Investment Bank, or AIID, has approved a loan of \$120 million for a project that aims to upgrade and expand the power transmission system in Chattogram, according to a statement on the bank's website.

An initiative of the Power Grid Corporation of Bangladesh, the project titled "Bangladesh Power System Upgrade and Expansion Project" will construct and upgrade more than 46 km of double-circuit transmission lines and associated substations and line bays. The project will also improve voltage stability and reduce voltage fluctuations and the need to spread the demand for electrical power, allowing more residences and businesses to connect to the regional grid. The Bangladesh Power System Upgrade and Expansion Project is one of four energy projects in Bangladesh that have received funding from AIIB, the bank said. It added that all four projects are part of the Government of Bangladesh's target to achieve affordable electricity for all by 2021. The projects are geared towards enhancing distribution capacity, increasing the number of rural and urban electricity

consumers, improving efficiency in gas production, expanding gas transmission pipeline capacity and increasing power generation capabilities in Bangladesh.

Japan's support comes with 'long-term commitment, trust'

Japan's development cooperation comes with 'long-term commitment and trust', an expert says.

Professor Naohiro Kitano of the Global Center for Science and Engineering, Waseda University, spoke in Dhaka and introduced Japan's recent engagements in the field of Official Development Assistance (ODA) overseas. He was the former director of JICA Research Institute. The Embassy of Japan and the Bangladesh Institute of International and Strategic Studies (BIISS) jointly organized special lecture "Japan-Bangladesh Development Cooperation for enhanced Connectivity" at BIISS auditorium recently. Prof Kitano focused on the Japanese model for development cooperation, explaining its feature as "long term commitment with trust" that he said, can benefit the people in the recipient country through its inclusive approach and human resource development. He also focused on the way how Japanese ODA has been facilitating the institutional and people-to-people connectivity, referring to the recent ODA projects in Bangladesh such as BIG-B initiative. The BIG-B initiative is a Japan-led development plan to accelerate industrial agglomeration along the Dhaka-Chittagong-Cox's Bazar belt area and beyond. It involves developing economic infrastructure, improving investment environment and fostering connectivity. The projects under this initiative include the construction of ultra-super critical coal fired power plant and a new commercial port in Matarbari. Japan is the largest development partner of Bangladesh

Exchange News

January-March 2019

"Investors' & Entrepreneurs' Conference-2019"

Dhaka, March 28, 2019: The stock market regulator organized "Investors' & Entrepreneurs' Conference-2019" in Dhaka and Chattogram to create awareness of investors about stock market investment. Md Mahbubul Alam, executive director of Bangladesh Securities and Exchange Commission (BSEC), disclosed the goals of arranging the conference under the "Investment Education Program" at a press conference held before the conference at its office in the capital city.

Conference in Dhaka was held on March 28 at Bangabandhu International Conference Center (BICC) where the Honorable Finance Minister AHM Mustafa Kamal was present as chief guest. The BSEC Chairman Prof. Dr. M Khairul Hossain presided over the program. BSEC commissioners, DSE and CSE officials were present at the conference also.

Newly elected CSE Chairman

Chattogram, March 31, 2019: The Board of Directors elected Maj Gen Mohammad Shamim Chowdhury, nwc, psc (Retd.) as the Chairman of Chittagong Stock Exchange Ltd. in line with the Exchanges Demutualization Act, 2013.

A commensurate military professional General Shamim retired from the Bangladesh Army in 2013, after completing almost thirty-five years of distinguished service to the nation. He matured in hallmark traits like ethical leadership, strategic thinking, HRM, HRD and simultaneous attention on multiple fields. His broad variety of experience includes successful leadership to the military formations & units, national level training & educational institutions; working in international environment under UN, top leadership

position in Chittagong Hill Tracts Development Board, national level projects management like preparation of electoral roll and national identity card, housing for the destitute, disaster management, national level protocol and dignitaries security, handling of counter insurgency and so on. General Shamim was effective in building coalitions in cross-cultural environment, having worked and learned from people nearly around the globe to include USA, UK, Australia, China, Sweden, the Netherlands, Saudi Arabia, Kuwait, Qatar, Malaysia, Morocco, Haiti, Nepal, Pakistan and India. For his distinguished service to the nation and international community, the General was decorated with fourteen operational & service awards that include one from the UN Secretary General (UN Peace Medal) and the other from US Government (US Army Achievement Medal).

Chattogram, March 30, 2019: Honorable Deputy Minster, Ministry of Education, Mohibul Hasan Chowdhury Nowfel was present as chief guest in the conference titled the same in Chattogram. BSEC Chairman and Commissioners were also present in the program. CSE Chairman, Directors, Managing Director, TREC Holders, executives and investors attended the conference.

On the other hand, Bangladesh Securities and Exchange Commission (BSEC) approved the appointment of Mr. S. M. Abu Tayyab as Independent Director of Chittagong Stock Exchange Ltd. Mr. Tayyab is a distinguished businessman. He is the Managing Director of Independent Apparels Ltd. and Brother's Apparels Ltd., Director of Mozaher Aushadhalaya. He is involved with various business forums, President of International Business Forum Chittagong Bangladesh, Former 1st Vice President of Bangladesh Garments Manufacturers Exporter Association (BGMEA), Former Director of Chittagong Chamber of Commerce & Industry and Member of Shipper's Council of Bangladesh. He is pertained with diversified social activities, Chairman of Coordination Committee China

Bangladesh Peoples Friendship Association Chittagong, Former Chairman of Chittagong Club Limited, Vice President of Nirapod Sharak Chai Central Committee, President of Nirapod Sharak Chai Chittagong.

DSE, CSE seek tax waiver on share transaction of SMEs

Dhaka, April 02, 2019: Dhaka and Chittagong stock exchanges recently urged for tax waivers on share

transaction of small and medium enterprises (SMEs) that would be listed with the Small Capital Board. Companies with a minimum paid-up capital of Tk 5 crore are eligible to raise funds from the platform. The bourses also urged the government to increase tax-free dividend income to Tk 1 lakh from the existing Tk 25,000, in order to increase the participation of small investors in the capital market. The

Dhaka Stock Exchange (DSE) and Chittagong Stock Exchange (CSE) separately made the demands in their budget proposals for the upcoming fiscal year (FY2019-20), during a meeting with the National Board of Revenue (NBR), presided by NBR Chairman Md Mosharraf Hossain Bhuiyan.

The stock exchanges also urged the government to reduce corporate tax for publicly listed companies to 15%, from the current 25%, in FY2019-20. At present, publicly listed companies have to pay a minimum of 25% and maximum of 40% tax, based on their business category. Additionally, they urged tax exemption on transaction of securities listed with SME platforms—currently 0.05%, in line with the existing law for the capital market. DSE and CSE also sought 100% tax exemptions on bond transactions and the income of stock exchanges.

Chittagong Stock Exchange (CSE) M Shaifur Rahman Mazumdar said that out of millions of companies

currently registered in the country, most are yet to be listed in the stock market. "Only a few hundred companies are listed, which is a very small number. In order to transform Bangladesh into a middle-income country, listing can play an important role developing the private sector," he added. He also said in order to increase market capitalization to GDP ratio, some urgent policy issues need to be addressed, which are: formulating policies to ensure listing of high-quality companies that are, at present, beyond the purview of the capital market or just unwilling to be listed; formulating policies for listing of state-owned and foreign companies; and establishing a corporate bond market through regulatory co-ordination and reformation.

NBR Chairman Md Mosharraf Hossain Bhuiyan said the board is working hard to frame out a business investment-friendly budget to mobilize industrialization and economic development in the country.

A roundtable discussion on "Ring the Bell for Gender Equality"

Chittagong, 7 March 2019: Chittagong Stock Exchange Limited (CSE) has organized a roundtable discussion on "Ring the Bell for Gender Equality" on the occasion of International Women's Day 2019 at CSE

Conference Hall, CSE, Chittagong. CSE has organized this program as the first time as a Partner Stock Exchange of the United Nations Sustainable Stock Exchanges Initiative (UN SSE), headquartered in Geneva. Globally, the theme of this year of the event is: "Think equal, build smart, innovate for change".

The "Ring the Bell for Gender Equality" event series is a partnership of the Sustainable Stock Exchanges Initiative, together with the United Nations Global Compact, UN Women, IFC, Women in ETFs and the

World Federation of Exchanges to raise awareness about the opportunities for the private sector to advance gender equality and sustainable development.

The program was presided by the CSE Managing Director Mr. M. Shaifur Rahman Mazumdar FCA, FCMA.

Ms. Sabiha Musa, Former MP was the Chief Guest. The discussants were: Begum Mustari Shafi, Eminent wife of a martyred Freedom Fighter and Women Leader; Professor Shaheda Islam, Chairman, Board of Intermediate and Secondary Education, Chittagong; Dr. Nazneen Kawshar Chowdhury, Deputy Secretary, Government of the People's Republic of Bangladesh and First Secretary of Bangladesh Rubber Board; Ms. Dilruba Ahmed, Principal, Little

Jewels School; Ms. Safia Ghazi Rahman, Founder and Principal, Sunshine Grammar School & College; Ms. Abida Sultana, Senior Vice President, Chittagong Women Chamber of Commerce & Industry; Ms. Roksana Akter Chy (Ruhi), Senior Vice President, Chittagong Women Chamber of Commerce & Industry; Dr. Munal Mahbub, Vice President, Chittagong Women Chamber of Commerce & Industry; Ms. Ivy Hasan, Founder-Doll's House & Former Senior Vice President, Chittagong Women Chamber of Commerce & Industry; Ms. Rekha Alam, Member, Chittagong Women Chamber of Commerce & Industry and Ms. Muniza Bashir, First Vice President, Dhaka Bank Limited.

They discussed on different aspects of Gender Equality and Women Empowerment. There were around 100 women participants in the roundtable discussion.

The Chief Guest Ms. Sabiha Musa, Former MP gave emphasis on the equality of women in every spheres of our lives and she reminded us on the quote of Banghabandhu Sheikh Mujibur Rahman "Sonar Bangla Gorte Sonar Manush Chai".

CSE MD Mr. M. Shaifur Rahman Mazumdar FCA, FCMA highlighted on creating awareness among the women. He also mentioned about the vital role the Stock Exchanges could play in ensuring Gender Equality among the listed companies. He proposed some declarations and those were adopted by the participants. The declarations were as follows:

- 1. Promote gender equality among your workforce.
- 2. Introduce gender equality standards and support gender-equality themed investment products.
- 3. Provide guidance, training, mentoring, and education to market participants on gender equality and the role of gender diversity in business performance.
- 4. Encourage or require listed companies to publicly report on relevant gender metrics.
- 5. Appoint one Woman Commissioner in the Bangladesh Securities and Exchange Commission (BSEC).
- 6. Participation of Women in the board of the listed companies as Independent Director.
- 7. Participation of Women as Director in the Board of the Stock Exchanges.
- 8. Participation of Women as Director in the Board of the Brokerage Houses.

- 9. Participation of Women in the top management of Exchanges, Listed Companies, and Brokerage Houses.
- 10. Promote Gender Index.
- 11. Formulate and promote work environment principles for women.
- 12. Formulate and promote principles for ensuring women's participation.
- 13. Encourage public and private investment for creating awareness on SDGs' Goal 5-Gender Equality and capacity building.
- 14. Formulate and promote principles to eliminate gender discrimination.
- 15. Proper circulation of all government initiatives on women empowerment and measurement of effectiveness.
- 16. Ensure women participation in stock market principle.

"Dead Malls" Are Still Being Used To Satisfy Consumers: Amazon's Approach

Daniel Laboe

Dead Malls

It should be no shock to hear that brick-and-mortar retailers are a dying breed. So far in 2019, roughly 6,000 stores have announced closures with only 2,641 new stores opening (3,353 net closures). This store closure figure is expected to double by the end of the year, according to Coresight Research. In 2018 brick-and-mortar retailers actually saw a small bounce back in foot-traffic with these retailers enticing consumers with attractive promotions. Data analytics firm Thasos tracked mobile phones to analyze this foot traffic and discovered a surge in 2018 that peaked in August but has declined since. Retailers can only sell products at a loss for so long and unfortunately once winter hit foot-traffic fell for most retailers and hasn't recovered.

The ability for a consumer to buy whatever they need or don't need without getting off the couch is why we are seeing an increasing number of "dead malls" in America today. Online retailers like Amazon (AMZN - Free Report) , Alibaba (BABA - Free Report) and eBay (EBAY - Free Report) are perpetuating this problem for retailers, giving consumers a seamless platform to satisfy their needs and wants at the click of a button. Brick-and-mortar retail closures are accelerating, and so are the number of abandoned malls.

Redevelopment Opportunities

Now the question is what to do with all these abandoned malls, how can they be put to good use short of demolition? These dead malls are being converted into office spaces to be utilized by businesses and educational institutes. They also make a perfect shell for a large corporation to use as a warehouse and/or distribution center.

Amazon is buying out abandoned malls, the same malls that they put out of business, and converting them into fulfillment centers. These "ghost malls" provide many advantages to Amazon's fulfillment centers conversions.

Malls provide the fulfillment center with sufficient size needed to run their extensive operations. The malls are usually located in residential areas allowing Amazon to get its goods out to consumers quicker and more efficiently.

Malls are typically built close to highways to make it easier/quicker for consumers to make it there in a timely fashion. This is useful to Amazon's converted fulfillment centers for obvious logistical reasons, goods are able to come and go from the distribution centers seamlessly.

These abandoned malls all have the necessary infrastructure already in place, such as sewage, electrical lines, gas lines, and water. Having this infrastructure already established makes Amazon's conversion quicker and allowing the fulfillment center to be up and running sooner.

Amazon is able to transition these forsaken voids in communities into productive business centers that create quality jobs for residence. This shift in retail from brick-and-mortar to e-commerce is precisely that: just a shift. These malls are still being used to fulfill consumer needs, it is just done in a different way.

The world is always changing and the key for any business to maintain its ability to get in front and ride the wave till it comes to an end, then paddle back out and ride the next one. Amazon is undoubtedly in front of this wave.

Amazon's Latest Earnings

Amazon destroyed earnings this quarter, beating EPS estimates by over 50% and showing year-over-year growth of 117%. AMZN is only up half a percentage point since this earnings release a week and a half ago (April 25th). Sell-side analysts have reduced EPS estimates for the next couple quarters but increased estimates for the full year by a marginal percentage. AMZN has been battling to reach a \$1 trillion market cap and is only about 4% short of that milestone.

AMZN has a beta of 1.62 meaning that this stock is extremely sensitive to the broader market's performance. Today AMZN is down 2% amidst reignited concerns over the China-US trade dispute. Negotiations are set to resume on Thursday of this week and how they conclude could have a substantial material effect on AMZN.

Radical New Technology Creates \$12.3 Trillion Opportunity

Imagine buying Microsoft stock in the early days of personal computers... or Motorola after it released the world's first cell phone. These technologies changed our lives and created massive profits for investors.

Today, we're on the brink of the next quantum leap in technology. 7 innovative companies are leading this "4th Industrial Revolution" - and early investors stand to earn the biggest profits.

- ৭. কমিশনের তদন্ত দল কর্তৃক রেনউইক যজ্ঞেশ্বর অ্যান্ড কোঃ (বিডি) লিঃ এর শেয়ার লেনদেনে উদ্বাটিত অনিয়ম এর বিষয়ে দেখা যায় য়ে, জনাব এ, এস, শহিদুল হক, জনাব মোঃ মিজানুর রহমান এবং জনাব মোঃ আব্দুল ওহাব ভূঁইয়া নিম্লে বর্ণিত সিকিউরিটিজ আইনসমূহ ভঙ্গ করেছেঃ
 - (ক) জনাব এ, এস, শহিদুল হক, রেনউইক যজ্ঞেশ্বর অ্যান্ড কোঃ (বিডি) লিঃ এর শেয়ারের অস্বান্ডাবিক মূল্য বৃদ্ধিতে সক্রিয় অংশগ্রহণের মাধ্যমে Securities and Exchange Ordinance, 1969 এর Section 17(e)(v) ভঙ্গ করেছে;
 - (খ) জনাব মোঃ মিজানুর রহমান, রেনউইক জজ্ঞেম্বর অ্যান্ড কোঃ (বিডি) লিঃ এর শেয়ারের অস্বান্ডাবিক মূল্য বৃদ্ধিতে সক্রিয় অংশগ্রহণের মাধ্যমে Securities and Exchange Ordinance, 1969 এর Section 17(e)(v) ভঙ্গ করেছে; এবং
 - (গ) জনাব মোঃ আব্দুল ওহাব ভূঁইয়া, রেনউইক জজ্ঞেশ্বর অ্যান্ড কোঃ (বিডি) লিঃ এর শেয়ারের অস্বান্তাবিক মূল্য বৃদ্ধিতে সক্রিয় অংশগ্রহণের মাধ্যমে Securities and Exchange Ordinance, 1969 এর Section 17(e)(v) ভঙ্গ করেছে।

উপরে বর্ণিত সিকিউরিটিজ আইন পরিপালনে ব্যর্থতার জন্য কমিশন, জনাব এ, এস, শহিদুল হককে সতর্কপত্র ইস্যু, জনাব মোঃ মিজানুর রহমানকে সতর্কপত্র ইস্যু, জনাব মোঃ আব্দুল ওহাব ভূঁইয়াকে সতর্কপত্র ইস্যু করার সিদ্ধান্ত গ্রহণ করেছে।

- ৮. এছাড়া, বিনিয়োগকারীদের স্বার্থে তথা জনস্বার্থে মুনু জুট স্টাফলারস্ লিঃ, মুনু সিরামিক ইন্ডাষ্ট্রিজ লিঃ এবং স্টাইল ক্রাফট লিঃ এর শেয়ার বাধ্যতামূলক স্পট-এ লেনদেনের পরিবর্তে আগামী ২০/০২/২০১৯ তারিখ থেকে মূল মার্কেটে লেনদেন হবে মর্মে কমিশন সিদ্ধান্ত গ্রহণ করেছে।
- ৯. ঢাকা স্টক এক্সচেঞ্জ লিমিটেড এর ট্রেক হোল্ডার শ্যামল ইক্যুইটি ম্যানেজমেন্ট লিমিটেড (ট্রেক নং-০৩) এর জুন ৩০, ২০১৭ইং এর নীরিক্ষিত আর্থিক প্রতিবেদন কমিশন কর্তৃক পরীক্ষান্তে তাদের সমন্বিত গ্রাহক হিসাব (Consolidated Customers' Account) এ ২২,৬৪,৪৬,৪১১,১৬ টাকা ঘাটতি পরিলক্ষিত হয়।

উক্ত ঘাটতি সমন্বয় করার জন্য কমিশন Securities and Exchange Ordinance, 1969 এর ধারা 20A এর অধীনে নির্দেশনা জারি করে জুলাই ৩১, ২০১৮ইং এর মধ্যে উক্ত ঘাটতি সমন্বয়ের জন্য সময়সীমা নির্বারণ করে দেয়। উক্ত সময়ের মধ্যে ঘাটতি সমন্বয়ের না করে শ্যামল ইকুইটি ম্যানেজমেন্ট লিমিটেড সময়সীমা বৃদ্ধির আবেদন করে এবং উক্ত প্রতিষ্ঠানের আবেদনের প্রেক্ষিতে ডিএসই থেকে প্রাপ্তব্য লড্যাংশ, কৌশলগত বিনিয়োগকারী থেকে প্রাপ্তব্য টাকা এবং সিকিউরিটিজ লেনদেনের ফ্রি লিমিট সুবিধা স্থগিত করার শর্তে অক্টোবর ৩১, ২০১৮ ইং সময় বৃদ্ধি করা হয়।

এতদসত্বেও শ্যামল ইক্যুইটি ম্যানেজমেন্ট লিমিটেড কমিশনের উপরোক্ত নির্দেশনা সম্পূর্ণ পরিপালন করেনি এবং কমিশনের নির্দেশে ফেব্রুয়ারি ১০, ২০১৯ তারিখে ঢাকা স্টক এক্সচেঞ্জ লিমিটেড এ ব্যাপারে একটি প্রতিবেদন দাখিল করে। উক্ত প্রতিবেদন পর্যালোচনায় দেখা যায় যে, সমন্বিত গ্রাহক হিসাবে এখনও ঘাটতির পরিমান ৯,৫৬,৯৪,৮৬৪.৯২ টাকা।

যেহেতু, শ্যামল ইক্যুইটি ম্যানেজমেন্ট লিমিটেডের এই ধরনের আচরণ বিনিয়োগকারীদের জন্য অত্যন্ত ঝুঁকিপূর্ণ এবং স্বার্থের পরিপস্থি এবং কমিশনের নিবন্ধন সনদে উল্লেখিত আচরণ বিধির সুস্পন্ত লজন, সেহেতু কমিশন কর্তৃক আজ ১৯.০২.২০১৯ তারিখের সভায় কমিশনের এনফোর্সমেন্ট বিভাগকে শ্যামল ইক্যুইটি ম্যানেজমেন্ট লিমিটেড এর বিরুদ্ধে সিকিউরিটিজ ও এক্সচেঞ্জ কমিশন (স্টক-ডিলার, স্টক-ব্রোকার ও অনুমোদিত প্রতিনিধি) বিধিমালা, ২০০০ এর বিধি ১২ মোতাবেক ব্যবস্থা গ্রহণের জন্য নির্দেশ প্রদান করা হয়েছে। উল্লেখ্য যে, উক্ত বিধি ১২ নিবন্ধন সনদ বাতিল ও স্থগিতকরণ সংক্রান্ত।

নির্বাহী পরিচালক ও মুখপাত্র।
